How to Read This Report

King Charles · Cancer Lagna · Aries Moon

A two-minute key to the marks and words you will meet throughout your year.

The convergence meter

Each chapter header carries four dots. They show how strongly the year's signals line up that month, **relative to your own year** — the more dots filled, the stronger the alignment, and your strongest month fills all four. Your year reaches these levels:

● ● ● ● your quietest months ● ● ● ● your year's peak

A month marked with a star (★) is a **month to circle** — one of the year's four strongest chapters, ranked across the whole year. The star marks that rank, not a dot level: a starred month keeps its star whatever its own meter shows. Read those first.

The words we use

Varshaphala

Your annual chart and forecast — one year of your life, read on its own.

Solar return · Varsha Pravesh

The moment the Sun returns to its birth spot each year — your astrological birthday, where the year resets.

Varsha Lagna

Your annual ascendant — the rising sign of the new year's chart.

Varshesha · year-lord

The planet that runs your year and sets its overall tone.

Muntha

A sensitive point in your annual chart that spotlights one life-area for the year, moving one sign each year. Its house is read in the annual chart (from the Varsha Lagna).

Pratyantar · sub-period

A short stretch within the year, finer than the main period, that paces actual events.

Mudda

The annual mood-cycle — it colours each month's energy, not its events.

Saham

A sensitive point that lights up a specific theme — like marriage or career — in the month the Sun crosses its sign.

Gochar · transit

Where the planets are in the real sky now, supplying timing and outside triggers.

Sade Sati

Saturn's roughly 7.5-year passage over your Moon — a slow, maturing phase that asks for patience.

Dasha

A planetary period — the timeline of which planet is steering a stretch of your life.

Thread

One of the three Life Area lines — career-and-money, relationships, health — tracked chapter by chapter on the Life Areas page.

Your Year at a Glance

King Charles · Cancer Lagna · Aries Moon

This is a year that asks you to hold steady, tend what matters, and trust that quiet effort is building something real.

This year comes in two distinct halves, and knowing that changes everything. Until **November 15, 2026**, you are closing out a previous solar year — finishing what was started, settling what is unresolved. Then on **November 15, 2026**, a new annual chart takes over, with the **Moon** as your year-lord. That handover is the real beginning of the year ahead.

The **Moon** as year-lord means this year runs on feeling, instinct, and close relationships — not on force. Its strength is moderate. That is honest information: this is not a year that hands you easy wins. It is a year that rewards showing up steadily, even when progress is slow. Persistence matters more than speed here.

Saturn is also threading through your life in a way that asks for patience above all else. The early part of this window is one phase of that; by **June 3, 2027**, **Saturn** moves into a heavier stretch. These are not the same pressure, and the report walks you through each one. What holds across both is the same advice — don't rush, don't overextend, and don't mistake slowness for failure.

There is something genuinely worth watching, though. A quiet alignment is forming between your year-lord and **Saturn** — two forces that rarely cooperate, slowly moving into agreement. It is real, but it takes time to ripen. The most active stretches fall around **July 16–August 16, 2026**, **October 16–November 15, 2026**, **March 14–April 13, 2027**, and **June 14–July 16, 2027**. In those windows, the year's themes come into sharpest focus. This is a year for building quietly, not loudly — and that kind of building lasts.

Tajika reads whether your year's matters are forming (Itthāsala — coming together) or closing (Īsarapha — the window passing), from the exact angles between your chart's key planets.

FORMING · WEAK

You and the year's focus — coming together this year — a matter set in motion is on track to mature. Real but weakened (a key planet is retrograde or poorly placed), so expect delay or a smaller result.

CLOSING

Money & family — just past its window this year — the opening was there but the timing has largely gone. Act early, or let it rest.

MONTH 8 OF YOUR PREVIOUS SOLAR YEAR

Jun 14, 2026 — Jul 16, 2026

CONVERGENCE ●●●●

Already underway — began **Jun 14, 2026**; its earliest days have passed.

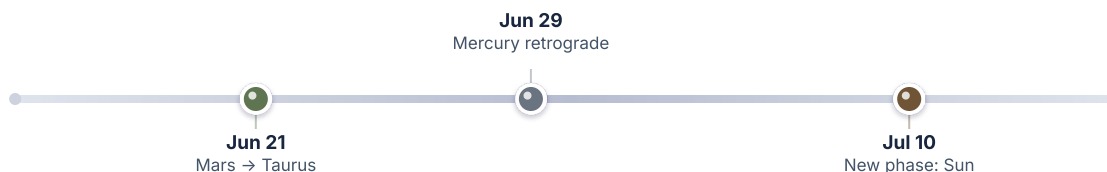

Your sense of self sharpens this month — stay grounded, speak carefully, and let your real confidence show.

WHAT'S GOING ON

This month turns your attention inward, toward who you are and how you come across. You may feel more visible than usual, or more aware of how others see you. That awareness is useful — lean into it honestly.

The month moves through a few shifts. On **June 21**, energy picks up in your social and financial life, giving you a small push forward. Then on **June 29**, communication slows and tangles — double-check plans, re-read messages, and hold off on big decisions if you can. By **July 10**, the focus sharpens again and a clearer, more confident version of you steps forward. As the year's quiet-effort-and-steady-tending continues, this is a month to let that inner work show.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Speak up about something you've been sitting on — the window around **June 21** gives you a natural opening.
- After **June 29**, slow down before replying to anything important — Mercury's tangle is real and short-lived.
- From **July 10** onward, own your presence; this is a good time to step into a role or conversation you've been avoiding.

The most solid thing you can offer right now is simply being yourself, clearly and without apology.

THE CHART BEHIND THIS

Venus pratyantar lord (ruling houses 4 and 11, natively in house 3) channels themes of connection and gain through communication, converging with Jupiter transiting house 1 — the month's anchor. The Sun's passage through Taurus spotlights the Vidya saham (annual house 2).

MONTH 9 OF YOUR PREVIOUS SOLAR YEAR · ★ A MONTH TO CIRCLE

Jul 16, 2026 — Aug 16, 2026

CONVERGENCE ●●●●

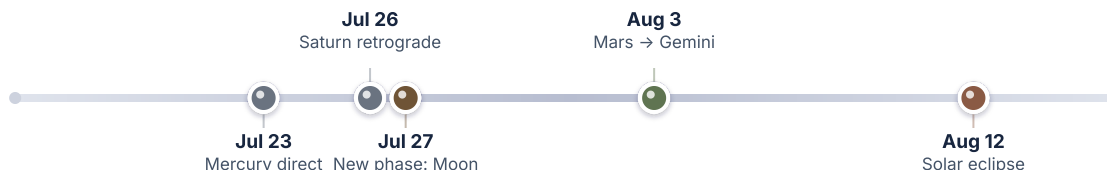

This mid-July to mid-August month asks you to slow down, clear hidden costs, and protect your energy before a big eclipse resets your path.

WHAT'S GOING ON

The first part of this month has a quieter, inward pull. Things that were stuck or delayed start to loosen after **July 23**, when communication and plans begin flowing again. Then, from **July 27**, the month's energy shifts — a new inner rhythm takes over, and your feelings and instincts become your best guide. Pay attention to what drains you quietly in the background: money going out, energy leaking away, things you haven't quite dealt with. This is where the month's real work lives, as the year's call to hold steady and tend what matters continues.

The month builds toward something bigger. **August 3** brings a sharper, more driven edge — you may feel pushed to act or spend, but patience pays more than speed here. Then **August 12** arrives with a solar eclipse landing right across your sense of self and your closest relationships. Eclipses don't destroy — they redirect. Something about who you are or how you show up in partnership is quietly being reset. Let it.

HOW THE MONTH UNFOLDS

WHAT TO DO

- After **July 27**, trust your gut over logic — your instincts are unusually clear this stretch.
- From **August 3**, watch spending and energy output carefully; act on need, not impulse.
- Around **August 12**, give yourself space to absorb the eclipse's shift — don't force decisions on that day.

Not every turning point announces itself loudly — some of the most important ones just quietly arrive.

MONTH 10 OF YOUR PREVIOUS SOLAR YEAR

Aug 16, 2026 — Sep 16, 2026

CONVERGENCE ●●●●

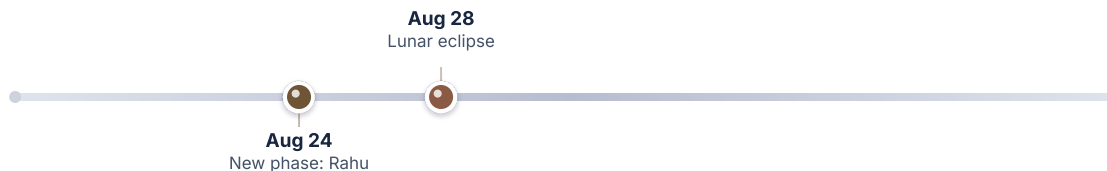

Shared money and hidden pressures come into focus this August — look closely before signing or spending.

WHAT'S GOING ON

From **Aug 16**, the month opens with your personal presence feeling strong. You have energy and a sense of purpose. That is a good foundation for what comes next.

Around **Aug 24**, the energy shifts. A new inner drive pushes you toward bolder moves — but it can also make you restless and impatient. Then on **Aug 28**, a lunar eclipse lands right across your money axis — what you own versus what you share with others. Something hidden about a debt, a joint account, or a shared resource may surface now. Pause before acting. As the year's quiet-effort-and-steady-tending thread continues, this is a moment to look, not leap.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Before **Aug 24**, settle any financial agreements you can — the energy after that date gets more unpredictable.
- Around **Aug 28**, review shared finances, loans, or anything you owe or are owed — eclipses reveal what was hidden.
- Stay patient through mid-September; the restlessness you feel is real, but slow and careful wins here.

What comes to light now is meant to be seen — don't turn away from it.

THE CHART BEHIND THIS

Sub-period: Moon Tone: Venus Muntha · Annual H9 Lunar eclipse Karya

Moon pratyantar (lord of house 1, natally in house 10) anchors personal drive and visibility; the shift to Rahu's pratyantar on Aug 24 intensifies the 8th-house convergence — Rahu transiting house 8 in Aquarius, Ketu transiting house 2, and the lunar eclipse of Aug 28 falling on the 8/2 axis together focus the month squarely on shared resources, hidden finances, and transformation. The Sun's passage through Leo spotlights the Karya saham (annual house 5).

MONTH 11 OF YOUR PREVIOUS SOLAR YEAR

Sep 16, 2026 — Oct 16, 2026

CONVERGENCE ●●●●

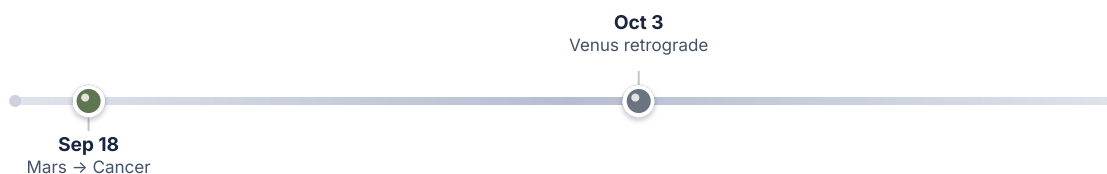

Mars arrives to sharpen your energy — use that drive on real goals, not arguments.

WHAT'S GOING ON

This month opens with a burst of physical and personal energy. **September 18** brings **Mars** into your first house, the zone of your body, presence, and how you show up in the world. You may feel more assertive, restless, or impatient than usual. Channel that into action, not friction.

Then the mood shifts toward the end of the month. **October 3** brings **Venus** to a standstill in your home-and-roots area (4th house). Relationships at home may feel uncertain or slow. This is a pause, not a collapse — it asks you to look honestly at what you value close to home, as the year's quiet, steady effort continues to build beneath the surface.

HOW THE MONTH UNFOLDS

WHAT TO DO

- From **September 18**, direct your extra energy into focused work or physical activity — Mars is fuel, and it burns best with a clear target.
- Watch your tone in personal and home conversations, especially as **October 3** approaches — impatience at home can cost more than it gains.
- Use Venus's slowdown after **October 3** to reflect on a home or relationship matter rather than push for a quick resolution.

The fire in you this month is a gift — it only becomes a problem if you aim it at the wrong people.

THE CHART BEHIND THIS

Sub-period: Rahu Tone: Venus Muntha · Annual H9 Mars→Cancer Karya

Mars transiting house 1 from September 18 creates the month's convergence on house 1, amplifying the pratyantar lord Rahu's natal placement in house 10 through the body and drive of the first house. Venus stations retrograde in house 4 on October 3, colouring the month's tone with a reflective, inward pull on domestic matters. The Sun's passage through Leo spotlights the Karya saham (annual house 5).

MONTH 12 OF YOUR PREVIOUS SOLAR YEAR · ★ A MONTH TO CIRCLE

Oct 16, 2026 — Nov 15, 2026

CONVERGENCE ●●●●

Your money and family life surge this October–November — circle this month and act on financial decisions with care.

WHAT'S GOING ON

This month is anchored in your money-and-family area (2nd house). That means income, savings, how you speak about what you value, and the people closest to home all come into sharper focus. **October 31** is the turning point — a major shift arrives that amplifies everything in this part of your life.

From **October 24**, a communication slowdown begins. Paperwork, contracts, and conversations about money may stall or need revisiting. That clears by **November 13**, the same day a burst of drive arrives. Then on **November 14**, a relationship or creative matter that felt stuck finally moves forward again. The month ends on a more settled, forward-facing note — as the year's quiet, steady effort continues to build.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Circle **October 31** — make or finalise one important financial decision around this date, when the energy is strongest.
- From **October 24 to November 13**, slow down on signing documents or making big money commitments; double-check details instead.
- After **November 13–14**, use the renewed momentum to have a conversation you have been putting off about money or a close relationship.

The ground is shifting under your feet this month — step carefully, then step forward.

This is a starred tentpole month with a strong convergence on house 2: Jupiter transits into Leo (house 2) on Oct 31, 2026, joining Ketu already placed there, and Mars follows into Leo (house 2) on Nov 13 — both activating the 2nd house directly. Rahu's pratyantar runs as the event spine, with Rahu natively occupying house 10 (career/public standing), colouring ambition in the background; the month's convergence, however, is anchored by house 2.

MONTH 1 OF YOUR CURRENT SOLAR YEAR

Nov 15, 2026 — Dec 15, 2026

CONVERGENCE ●●●●

◆ Your new solar year begins this month — the annual chart, year-lord and Muntha renew here.

Your new solar year opens mid-November — stay grounded, watch how you come across to others, and let things settle before acting.

WHAT'S GOING ON

Your new solar year begins on **Nov 15, 2026**. This opening chapter is quieter than what lies ahead. The energy turns inward. You may feel a pull to reassess who you are and how you present yourself to the world.

Around **Dec 6, 2026**, something shifts in your relationships (7th house). A person or situation asks for your attention. Then on **Dec 10** and **Dec 13**, two slow planets change direction within days of each other. Decisions that felt stuck may loosen — but wait and watch before committing. Let the dust settle first.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Notice how you carry yourself this month — small changes in how you show up can matter more than big moves right now.
- Around **Dec 6, 2026**, pay attention to a relationship or one-on-one situation that comes into focus; listen more than you speak.
- After **Dec 13, 2026**, let any newly loosened decisions breathe for a few days before you act on them.

A year that rewards quiet effort starts exactly like this — slow, steady, and more important than it looks.

MONTH 2 OF YOUR CURRENT SOLAR YEAR

Dec 15, 2026 — Jan 13, 2027

CONVERGENCE ●●●●

Your money and resources come into sharp focus this month — keep spending grounded and review what you truly value.

WHAT'S GOING ON

From **December 15** into early January, your attention turns to money, possessions, and what you own. You may feel a pull to spend or commit financially. Hold steady — this is a month to review, not to rush.

On **January 3**, the sub-period shifts to **Jupiter**, and the mood lifts a little. A sense of possibility opens around income or something you've been building quietly. Then on **January 10**, **Mars** stations retrograde in your money-and-family area (2nd house). Energy around finances slows down or turns inward. Pause before making big money moves after that date.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Review your spending and savings before **January 10** — that date marks a slowdown in financial momentum.
- From **January 3**, lean into Jupiter's opening: think bigger about income, but plan before you act.
- Hold off on major purchases or financial commitments after **January 10**, when the energy reverses.

Quiet attention to what you have is worth more right now than chasing what you don't.

MONTH 3 OF YOUR CURRENT SOLAR YEAR

Jan 13, 2027 — Feb 12, 2027

CONVERGENCE ●●●●

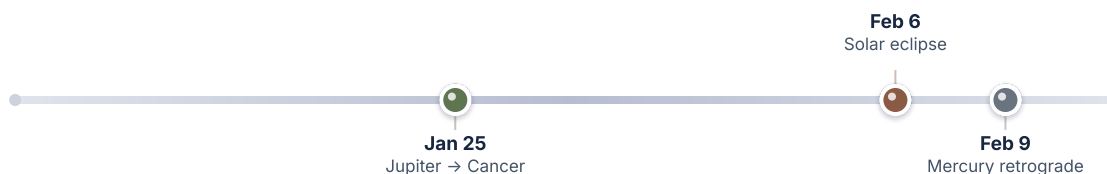

Your sense of self is being quietly reshaped this month — stay present and let things settle before acting.

WHAT'S GOING ON

Something is shifting in how you see yourself. It is not dramatic, but it is real. Between **January 13** and **February 12**, you may feel pulled to revisit who you are and what you truly want. Old questions about identity and direction come back around — not to punish you, but to be looked at more carefully.

The second half of the month asks for patience. A **February 6** solar eclipse lands on the axis of self and partnership, stirring something in both areas at once. Then, just days later on **February 9**, **Mercury** slows to a stop and turns back — making this a poor time to sign anything or lock in big decisions. Let the dust settle. As the year's quiet-effort-and-steady-tending thread continues, this is a month to observe, not to push.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Pause before committing to anything new around **February 6–9** — the eclipse and Mercury's reversal together make this a week for watching, not deciding.
- Revisit a past plan or relationship question that felt unresolved — this month's energy genuinely supports that kind of honest review.
- Rest more than usual and pay attention to what your body and mood are telling you — self-awareness is the real work this month.

Not every shift needs to be acted on right away — some things just need to be felt.

Feb 12, 2027 — Mar 14, 2027

CONVERGENCE ●●●●

A lunar eclipse shakes up money and shared resources — stay steady, review before you act, and let clarity come to you.

WHAT'S GOING ON

The **lunar eclipse on Feb 20** lands across your money and shared-resources area. You may feel a sudden shift — a bill, a shared expense, or a change in what someone owes you or you owe them. This is not a crisis. It is a signal to look closely at what you have and what you share.

Mercury moves forward again on **Mar 3**, and conversations that felt stuck start to flow. Plans you shelved in the past few weeks can be picked back up now. Then, on **Mar 10**, a planet re-enters your personal space — but this is a review, not a fresh start. The real opening comes only after **Apr 1**, so hold off on big launches for now.

HOW THE MONTH UNFOLDS

WHAT TO DO

- After **Feb 20**, check your finances carefully — look at shared accounts, debts, or anything you owe or are owed.
- From **Mar 3** onward, restart any stalled conversation or paperwork — Mercury moving forward clears the path.
- On **Mar 10**, notice what old issue resurfaces around your energy or identity — sit with it rather than forcing a decision before **Apr 1**.

Clarity is coming — you don't have to chase it right now.

WHAT'S GOING ON

This is one of the year's circled months, and it centres on you — your body, your presence, how you carry yourself. Something that felt stuck or slow starts to move again. **Mars** turns direct on **Apr 1, 2027**, and you may notice a physical shift — more energy, more willingness to act. The fog lifts.

Then, on **Apr 13, 2027**, **Jupiter** turns direct too. This is the bigger moment. A sense of purpose and forward motion returns. As the year's quiet, steady effort continues to build, this is the month it starts to feel like it's actually going somewhere. Trust what you feel on that day.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Notice how your energy shifts around **Apr 1** — let it move you into action you've been putting off.
- On and after **Apr 13**, say yes to something that stretches you — Jupiter turning direct opens real doors.
- Take care of your body this month; it is both the signal and the vehicle for everything else happening.

When the fog clears, move — don't wait for permission.

Jupiter's pratyantar runs the event spine here; as lord of the 6th and 9th, placed natally in the 6th, its direct station on Apr 13 in Cancer (house 1) is the month's main engine. Mars direct on Apr 1 in Cancer (house 1) adds a second signal — both stations converge on house 1, confirming the month's focus on self, body, and personal forward motion. The Sun's passage through Aquarius spotlights the Karya and Roga saham (annual houses 8 · 8).

MONTH 6 OF YOUR CURRENT SOLAR YEAR

Apr 13, 2027 — May 14, 2027

CONVERGENCE ●●●●

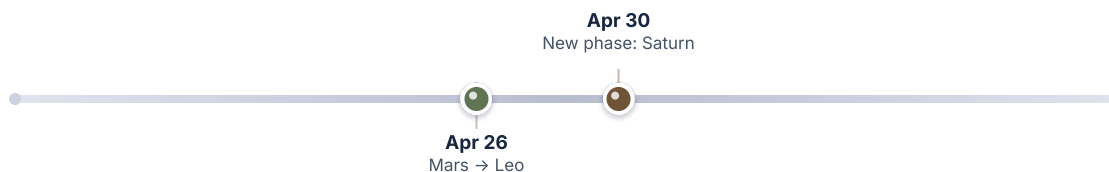

Money and daily effort sharpen this month — spend carefully and keep showing up.

WHAT'S GOING ON

This month opens with a focus on your daily work and what you earn from it. You may feel a pull between what you owe and what you want to spend. That tension is real, but it is also productive — it pushes you to be precise.

Around **April 26**, **Mars** moves into your money-and-resources area (2nd house). Energy around spending, earning, and even your voice picks up noticeably. Then on **April 30**, the sub-period shifts — and with it, the month's mood turns more serious and deliberate. **Saturn's** steadying influence takes over, asking you to slow down and be disciplined rather than reactive. As the year's quiet effort continues to build, that shift actually helps.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Watch your spending closely from **April 26** onward — Mars can make purchases feel urgent when they are not.
- After **April 30**, lean into steady, careful work rather than pushing hard for fast results.
- Keep daily routines tight this month — small, consistent actions are what move things forward.

Discipline right now is not a limit — it is the thing that makes your effort count.

Jupiter's pratyantar (sub-sub-period) runs through **April 30**, with Jupiter ruling the 6th and 9th houses and occupying natal house 6 — anchoring the month in daily work and service. Mars transiting into house 2 on **April 26**, followed by Saturn's pratyantar opening on **April 30**, converges on house 2 as the month's focal point. The Sun's passage through Aries spotlights the Punya saham (annual house 10).

MONTH 7 OF YOUR CURRENT SOLAR YEAR

May 14, 2027 — Jun 14, 2027

CONVERGENCE ●●●●

Money and close bonds need steady attention this May–June — keep your word and watch your spending.

WHAT'S GOING ON

This month runs from **May 14** to **June 14, 2027**. The main story is about your money and the people closest to you. **Saturn's** energy runs through everything right now, asking you to be reliable, careful, and honest — especially with finances and commitments. You may feel a quiet pressure to settle something you've been putting off.

Around **June 3**, a shift in energy arrives that touches your career and public life. Things feel more serious and demanding at work. Then around **June 10**, **Mercury** slows down and turns backward — this is a poor time to sign contracts or make big financial decisions. Pause, review, and wait before committing to anything new.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Before **June 3**, tidy up any loose money matters — pay what you owe and collect what's owed to you.
- After **June 10**, hold off on signing agreements or making big purchases until things become clearer.
- Stay honest and consistent with the people closest to you this month — your reliability matters more than usual.

The quiet, careful choice you make now is the one that holds.

THE CHART BEHIND THIS

Saturn pratyantar — lord of houses 7 and 8, natively placed in house 2 — anchors this month firmly on house 2, the money-and-close-bonds axis. Saturn's ingress into Aries (house 10) on Jun 3 adds career weight, while Mercury's retrograde station in house 12 on Jun 10 counsels review over new commitments. The Sun's passage through Aries spotlights the Punya saham (annual house 10).

MONTH 8 OF YOUR CURRENT SOLAR YEAR · ★ A MONTH TO CIRCLE

Jun 14, 2027 — Jul 16, 2027

CONVERGENCE ●●●●

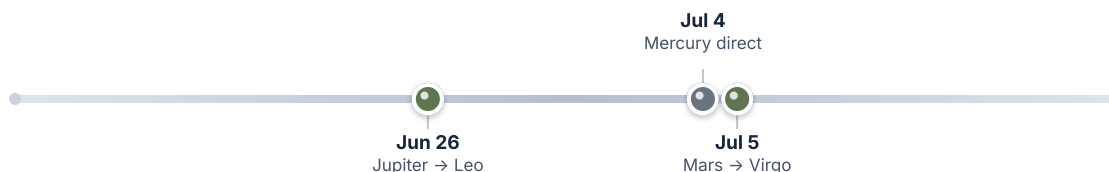

Your money and resources come into sharp focus this month — track what you earn and what you owe.

WHAT'S GOING ON

This is a month to circle. From **June 14**, your finances and material security move to the centre. Something shifts around **June 26** — income, a resource, or a practical decision about what you own or earn becomes clearer and more pressing. This is part of the year's quiet, steady effort paying forward.

After **July 4**, communication that felt stuck or tangled begins to move again. Conversations about money, shared costs, or what you owe someone can finally go somewhere. Around **July 5**, energy picks up and you feel ready to act, reach out, or push a practical plan forward. Hold steady and let the pieces settle before you commit.

HOW THE MONTH UNFOLDS

WHAT TO DO

- Mark **June 26** — make a clear-eyed list of your income, savings, and what you owe right now.
- After **July 4**, follow up on any message, agreement, or conversation that stalled over the past few weeks.
- From **July 5**, use the fresh energy to move a practical plan forward — but read any agreement carefully before signing.

The quiet work you put in all year has been building toward exactly this.

★ circle this month

Saturn pratyantar — lord of houses 7 and 8, natally placed in house 2 — drives the convergence on house 2 (money, owned resources). Jupiter's ingress into house 2 on Jun 26, 2027 amplifies this directly; Mercury's direct station on Jul 4, 2027 in house 12 lifts communication blocks; Mars entering house 3 on Jul 5, 2027 adds initiative and forward motion.

Supportive Practices for Your Year

King Charles · Cancer Lagna · Aries Moon

Vedic tradition pairs each year's planetary weather with gentle, supportive practices. These are offered as time-honoured ways to steady yourself and stay aligned — not as fixes or guarantees. Do what resonates; consistency matters more than scale, and they complement your own effort rather than replace it.

Your supportive gemstone

Red Coral · मूँगा (Moonga)

set in Gold or Copper · Ring finger · first worn on a Tuesday · 5–7 carats

Mars is the yogakaraka for this lagna, in own sign in Scorpio.

Also supportive: Yellow Sapphire (पुखराज (Pukhraj)).

Best left aside this year: Emerald, Diamond — these strengthen planets that already weigh on your chart.

Mantra & giving practices

Keyed to the planets your year leans on most. A mantra is best begun on the planet's day and kept up steadily.

MARS

ॐ क्रां क्रीं क्रौं सः भौमाय नमः

Om Kraam Kreem Kraum Sah Bhaumaaya Namah

250 a day, toward 10,000 over about 40 days.

Give Red lentils (masoor dal), Red cloth, Copper utensil on a Tuesday **Honour** Lord Hanuman **Fast** on Tuesday

JUPITER

ॐ ग्रां ग्रीं ग्रीं सः गुरवे नमः

Om Graam Greem Graum Sah Gurave Namah

475 a day, toward 19,000 over about 40 days.

Give Yellow cloth, Turmeric (haldi), Chana dal on a Thursday **Honour** Lord Brihaspati **Fast** on Thursday

Gemstones are optional and personal — if you choose one, a clean, untreated stone worn when it feels right is enough. None of these practices replaces medical, legal or financial care. This report is your complete reading.

About This Report

King Charles · Cancer Lagna · Aries Moon

This Varshaphala (annual) report is computed from your exact birth chart using the classical Tajika system. Your solar return (Varsha Pravesh) — the moment the Sun returns to its birth longitude — anchors the annual chart from which the Year Lord (Varshesha), Muntha, Sahams and Mudda dasha are derived. Each annual chart is cast at a solar return; your report's window opens at the start of the solar month you were in when you ordered — Jun 14, 2026 — and runs 13 chapters (397 days) through Jul 16, 2027, spanning the close of one solar year and the opening of the next — the annual chart, Year Lord and Muntha hand over at your birthday solar return (shown on the Engines page).

The year is read as a single drilling-down story: the annual chart sets the theme, your natal Vimshottari sub-periods (down to pratyantar) pace the events, planetary transits (gochar) supply the timing, and the Mudda dasha colours the mood. Where several of these converge on one life area, that month is marked to circle and flagged with a convergence meter in its header. Every date and position in this report is astronomically computed; the interpretation weaves them into one coherent reading.

How this report is computed

Zodiac & ayanamsa

Sidereal, Lahiri (Chitrapaksha) ayanamsa.

Ephemeris

astronomy-engine — high-precision VSOP87 / ELP positions; no look-up tables.

House system

Whole-sign (Rāśi): each sign is one house. Houses for your transits and dasha periods are counted from your natal Lagna. The Muntha and Sahams are points of the annual chart, so their house is counted from the Varsha Lagna (the annual ascendant), following classical Tajika (B.V. Raman). The Sade Sati backdrop is counted from your Moon. Each frame is labelled where it appears.

Annual chart

Tajika, cast at the solar return. The Varshesha is chosen from the five Panchadhikari office-bearers by Panchavargeeya bala; the Muntha advances one sign each year.

Timing

Events follow your natal Vimshottari dasha down to pratyantar (sub-sub-period); mood follows the Mudda (Varsha Vimshottari) annual dasha.

Aspects

Tajika yogas (Itthāsala, Īsarapha ...) read on the five Ptolemaic angles within classical deeptamsha orbs; applying vs separating judged from real planetary motion.
